1. INTRODUCTION TO TESTING

Testing is the process of verifying whether the developed system works according to the expected requirements. The Gate Pass Monitoring System is tested to ensure modules such as login, gate pass request, approval process, barcode verification and entry/exit logging work correctly.

2. BLACK BOX AND WHITE BOX TESTING

Black box testing checks system functionality based on inputs and outputs. White box testing checks the internal logic and code structure of the system.

3. UNIT TESTING

Unit testing verifies individual modules such as login module, gate pass request module, approval module and barcode scanning module.

4. INTEGRATION TESTING

Integration testing ensures that modules interact properly, such as student request, advisor approval and security verification.

5. SYSTEM TESTING

System testing evaluates the complete Gate Pass Monitoring System as a whole to ensure secure login, proper workflow, and accurate entry and exit logs.

Table 1 Login Form (Advisor/HOD)

SL.NO	TEST CASE	EXPECTED RESULT	TEST RESULT
1	Enter valid login credentials Successful	Advisor dashboard should display	
2	Enter invalid credentials	Login should fail	Successful

Table 2 Gate Pass Request

SL.NO	TEST CASE	EXPECTED RESULT	TEST RESULT
1	Submit gate pass request	Request stored in database	Successful
2	Submit incomplete form	Error message displayed	Successful

Table 3 Gate Pass Approval

SL.NO	TEST CASE	EXPECTED RESULT	TEST RESULT
1	Advisor approves request	Status updated to approved	Successful
2	Advisor rejects request	Status updated to rejected	Successful

Table 4 Barcode Verification

SL.NO	TEST CASE	EXPECTED RESULT	TEST RESULT
1	Scan barcode at gate	Gate pass details displayed	Successful
2	Scan invalid barcode	Invalid pass message	Successful

Table 5 Exit Logging

SL.NO	TEST CASE	EXPECTED RESULT	TEST RESULT
1	Student exits with valid pass	Exit time recorded	Successful

Table 6 Logout

SL.NO	TEST CASE	EXPECTED RESULT	TEST RESULT
1	Click logout button	Return to login page	Successful
